

Audubon International's Model for Achieving Sustainability

Individual action is the first step toward a more sustainable future. But Audubon International's ultimate goal is take individual action to a higher level by engaging entire communities. In this way, we can maximize the benefits of our efforts to improve the quality of the environment in the communities in which we live. The Audubon Cooperative Sanctuary Programs, Audubon Signature Programs, and Sustainable Communities Program engage people at various points along a continuum from individual stewardship action to property level environmental management to community-wide involvement.

From Individual Action to Community-wide Initiatives

For detailed information on sustainability, refer to Audubon International's Principles for Sustainable Resource Management available at www.auduboninternational.org.
