1. Statement of Affirmation

"I affirm that we will fulfill the following responsibilities as an Official Release Site for the Raptor Relocation Network."

Overall Purpose:

- We will provide critical habitat for raptors found at Newark-Liberty, JFK, and LaGuardia airports that are being relocated for safety reasons, including bird strikes.

Responsibilities:

- 1. Habitat Evaluation Checklist and Site Visit- We will complete a "Habitat Evaluation Checklist" and receive a site visit from AI staff to assess our course's ability to provide food, habitat, and space for raptor species.
- 2. Raptor Release Network Point Person- We will be responsible for designating a contact person at our course who will receive alerts from wildlife biologists and Audubon International during active relocations. (We understand that relocated raptors may arrive at course within 24 hours of trapping.)
- 3. Monitoring- We will be responsible for designating monitors who will participate in tracking activity by recording sightings and observations following each and every relocation. Monitors may be course staff, members, or community volunteers.
